Delivering healthier outcomes

Dear colleagues,

In celebration of 10 years of the European Healthcare Design (EHD) Congress, SALUS Global Knowledge Exchange and Architects for Health are delighted to welcome you to the Future Health 2050 International Symposium and EHD Champions Awards Live Judging and Dinner. Today's event combines a unique learning opportunity and reflection moment as we both look forwards to identify strategies for the future and backwards to embrace the lessons of the past.

With health systems around the globe under stress, during the morning session, our expert speakers will explore the investment and transformation strategies open to the NHS and identify the lessons learnt from how other countries are addressing challenges of rising demand, fewer resources and strained finances.

In the UK, Lord Ara Darzi has highlighted in his *'Independent Investigation of the NHS in England'*, how patient access to care, quality of care, and the overall productivity and performance of the NHS have been chronically weakened, laying the ground for a new 10-year plan in the Spring. Disastrous reforms, loss of trust and goodwill with frontline staff, the aftershocks of the pandemic and a chronic lack of capital investment, set against the backdrop of increasing demands on the health service and a deteriorating health of the nation, are cited as the cause of the NHS's "critical condition".

The UK Government has recognised that the NHS needs to make three big shifts in where, how and what it delivers, moving services: from hospital to the community; from analogue to digital, and from sickness to prevention. But what investment and transformation strategies are needed? Lord Darzi estimates a shortfall of £37 billion of capital investment, including a backlog maintenance bill now reported at £13.8 bn. The funding commitments in the Autumn budget announcement include a £22.6 billion increase in revenue and a £3.1 billion increase in capital over two years, with £1 billion to support backlog maintenance and the replacement RAAC hospitals, and £1.5 billion for new capacity. This is welcome but only scratches the surface of the challenge. What options are available to address the chronic underinvestment in capital?²

Set against this backdrop, what role can design also play? In the afternoon session, the project teams behind the design and delivery of 18 healthcare projects and previous winners of the EHD Awards, will present live to our judges as they compete to be awarded the EHD Champions of Champions, providing a novel opportunity to reflect on the design innovations and impacts that have set the standard in healthcare infrastructure over the last ten years. The day will culminate with the awards ceremony in the evening, where the most impactful projects will be celebrated and the winners will be revealed. See pages 9-21.

With health systems around the world facing similar challenges, we're excited to welcome participants from around the world today to share how different global approaches to policy, planning and investment alongside case examples of healthcare design innovation from our 18 Champions award-winning projects can help shape the health systems and infrastructure of the future.

Unbroken: A call to invest

Three years on from Russia's invasion, against all odds, Ukraine's people remain resilient and defiant. In her keynote awards dinner address, Mariana Svirchuk updates the story of Ukraine's National Rehabilitation Centre, Unbroken and invites the world's healthcare design community to support its cause.

New and challenging emotions were aroused at last year's 10th European Healthcare Design Congress in response to Mariana Svirchuk's vivid and powerful keynote address that grounded delegates attending in the reality of healthcare provision in a conflict zone.

Established by the First Lviv Medical Union and the Lviv City Council with the support of the Ministry of Health of Ukraine, Unbroken is more than just a rehabilitation centre. It is a unique ecosystem of humanity that unites more than twenty projects, including two adult hospitals, two rehabilitation centres, one maternity hospital and one children's hospital providing a variety of services, including treatment, prosthetics, physical and psychological rehabilitation, housing, and reintegration.

Since the war began, 1861 hospitals have been destroyed across Ukraine and over 650 children have died, with many thousands more young people injured. The city of Lviv has turned into a huge humanitarian hub in which people fleeing the war find refuge. Among the Centre's areas of work are reconstructive surgery, orthopaedics and prosthetics. People are not only fitted with prostheses, they are made there. In addition, the Centre deals with physical, psychological and psychosocial rehabilitation.

Since the invasion, Unbroken has treated 1.5 million casualties, performed 68,000 surgical interventions, fitted 225 prosthetics, rehabilitated 6,985, and provided 17,000 mental health consultations.

Saving young lives: Operating theatre reconstruction

St Nicholas Hospital is the 440-bed children's hospital, treating and operating on children from as little as 500 grams in weight up to 18 years old. It serves patients in pediatric, surgical, neurological, and rehabilitation departments. The neonatology center, with its own intensive care unit, assists newborns requiring specialised long-term care. 150,000 displaced persons currently reside in Lviv, of whom 70,000 are children, all requiring medical assistance.

The operating block of the hospital performs complex surgeries daily, saving the lives of young patients. However, despite immense efforts, this vital operating unit is in urgent need of reconstruction. The operating block is in an extremely poor condition; the equipment is outdated and often malfunctions, complicating surgical interventions and reducing the quality of care provided. Ventilation and sterilization systems do not meet modern standards, posing risks to both patients and medical staff. Many areas require major repairs, as their technical condition fails to meet the required standards of safety and comfort.

To provide the best possible care, the operating block urgently needs reconstruction and equipping with state-of-the-art medical equipment and furniture. At a total cost of Euros 1,628,000 (Euros 407,000 per theatre), the project has the following key requirements:

- > **Renovation of the operating block:** Reconstruction of the four operating theatres to ensure they meet modern safety and comfort standards.
- > **Purchase of essential medical equipment and furniture:** To enhance the precision and quality of surgical procedures, all theatres require upgrading with new operating tables, lighting systems, and other critical items.

If you think you can help by investing time, services, equipment, technology or finance, speak with Mariana during the event, contact her directly at mariana.svirchuk@unbroken.org.ua or at unbroken.org.ua Alternatively contact Marc Sansom at European Healthcare Design at marc@salus.global

UNBROKEN

Guldmann **Ceiling Hoist Solution**

– *much more than a transfer from A to B*

Using safe patient handling technology is a way to keep both patients and care givers safe, and at the same time promote quality of service – and create more Time To Care.

Transfer
Treatment
Training

The Trainer Module for GH3+ adds yet another feature to the many applications that Guldmann ceiling hoists offer – increasing the utilization value of the solution.

- ✓ Dynamic weight relief up to 100 kg
- ✓ Enabling early mobilization
- ✓ Integrated into a GH3+ ceiling hoist

LIVE ON TV

Maximise your time at the Symposium and Champions Awards with the dedicated app, designed to help you prepare, connect, and explore. From building your personalised agenda to engaging with other attendees, the app ensures you stay informed and connected throughout the event.

Download the app

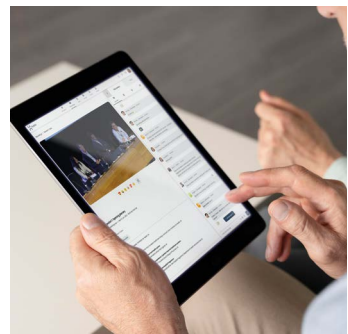

The event mobile application is available on both the Google and Apple App Stores. To download it, search for **Future Health 2050 and Awards** on your app store or scan the QR code.

Once downloaded, you'll need to sign into the app using the email address you used when registering for the Symposium and Awards.

Functions and features

- **Access LIVE and recorded sessions** – Watch live presentations or catch up on any missed sessions directly under the 'Agenda' tab
- **Explore the Champions Awards Poster Gallery** – Delve into the 'Expo' tab to learn more about the shortlisted projects
- **Connect with Sponsors and Partners** – Learn about sponsors' and partners' research and design innovations also in the 'Expo' tab. View videos, download brochures, and arrange in-person or virtual chats by sharing your contact details
- **Network effectively** – Under the 'People' tab, filter attendees by job roles, sectors, or interests to find relevant connections. Set up meetings, send personalised messages, or chat instantly to expand your network
- **Customise your agenda** – Create and manage your own personalised schedule, combining sessions, meetings, and activities that match your interests
- **Stay updated** – Receive real-time schedule updates and announcements from the organisers to keep you informed of any last-minute changes
- **Join the discussion** – Share your insights and engage in discussions with fellow attendees through the in-app forum
- **Spread the word** – Showcase your participation by sharing on social media using the hashtags #FH2050 and #EHDChampions – and don't forget to tag us @EHDCongress

08.30 Registration, welcome coffee and networking

Opening keynote: Health system policy and performance

Chair: Sunand Prasad OBE, programme director, EHD; principal, Perkins&Will, UK

Supported by

09.00–10.15 **Panel:** Layla McCay, director of policy, NHS Confederation, UK; Dr Charlotte Refsum, head of policy, Tony Blair Institute, UK; Matthew Tulley, redevelopment director, Imperial College Healthcare NHS Trust, UK

Lord Darzi states that “the NHS is in a critical condition”. There is consensus that recovery will require a transformation of provision from hospital to the community; from analogue to digital, and from sickness to prevention. But with an urgent need to address failing infrastructure, where will the money come from and what international lessons can be learnt?

10.15–10.45 Coffee, networking and Champions Award poster gallery

Session 2: Global perspectives: Health infrastructure and investment

Chair: Michèle Wheeler, international health & life sciences director, Lexica, UK

Supported by

10.45–12.00 **Panel:** Richard Darch, founder, Archus, UK; Cliff Harvey, joint VP development, Grand River Hospital, Canada
Kate Copeland, chair, Australian Health Design Council, Australia; Nicola Bertrand, head of architecture and construction, Asklepios, Germany; Hank Adams, global director – health, HDR, USA

Historical underinvestment in capital compared to other OECD countries, estimated by Lord Darzi as a shortfall of £37bn, has resulted in dilapidated buildings and outdated digital infrastructure and medical technology. What funding models are available to the NHS to modernise its healthcare infrastructure, and what can it learn from our international counterparts?

12.00–13.00 Lunch, networking and Champions Award poster gallery

Session 3a: Healthcare Design (Over 25,000 sqm)

Chair: Kate Copeland, AHDC, Australia; Judges: Tina Nolan, Lexica, UK; Paul Bell, Ryder, UK

Room: Burdett Suite

- 13.00 **Louisa Martindale Building, UK**
Gary Speirs, associate director - 3Ts capital, University Hospitals Sussex NHS Trust; Benedict Zucchi, principal, head of architecture, BDP; Enzo Guddemi, architect, director, BDP; Mark Harris, engineering director, BDP, UK
- 13.20 **Radboudumc Main Building, Netherlands**
Willemineke Hammer, partner, architect EGM architects, Netherlands
- 13.40 **The North Wing, Rigshospitalet, Denmark**
Stig Vesterager Gothelf, senior partner; Anne Strandgaard Hansen, senior associate, 3XN, Denmark
- 14.00 **Judges concluding remarks**

Session 3b: Healthcare Design (Under 25,000 sqm)

Chair: Brenda Bush-Moline, Stantec, USA; Judges: Mohammed Ayoub, HDR, USA

Room: Maxwell Room (floor 1)

- 13.00 **University of Cincinnati Gardner Neuroscience Institute (UCGNI), USA**
Max Adams, Associate principal, Perkins&Will, USA
- 13.20 **Yutjuwala Djwarr - Nhulunbuy Flexible Aged Care, Australia**
David Kaunitz, director; Kaunitz Yeung Architecture, Australia
- 13.40 **Renal Unit - Taranaki Base Hospital, New Zealand**
Alexandra Smith, Architect, Warren and Mahoney, New Zealand
- 14.00 **Judges concluding remarks**

14.15–14.30 Refreshments and Champions Awards poster gallery

**Session 4a: Mental Health Design**

Room: Burdett Suite

Chair: Beatrice Fraenkel, Design in Mental Health Network, UK

Judges: Cliff Harvey, Grand River Hospital, Canada; Jaime Bishop, AfH, UK

- 14.30 **Old See House, UK**
Richard Murphy, managing director; Richard Murphy Architects, UK
- 14.50 **Sikkerhetsbygget High Security Hospital at St Olavs University Hospital, Norway**
June Welo, architect and partner; Ratio Arkitekter AS, Norway
- 15.10 **Stella's Place Young Adult Mental Health, Canada**
Deanna Brown, principal, Stantec, Canada; Robyn Whitwham, associate, Stantec, Canada;
Chukuka Ebuta, Peer Initiatives Coordinator; Stella's Place, Canada
- 15.30 Judges concluding remarks

**Session 4b: Design for Health and Wellness**

Room: Maxwell Room (floor 1)

Chair: John Cooper, JCA, UK

Judges: Charlotte Ruben, White, Sweden; Ruairi Reeves, Medical Architecture, UK

- 14.30 **Maternity Unit at Kachumbala Health Centre 3, Uganda**
Dan Flower, design director; HKS, Mexico
- 14.50 **Vårdcentralen Nötkärnan, Bergsjön, Sweden**
Anders Olausson, senior lead architect; Wingårdhs, Sweden
- 15.10 **Woonzorgcentrum Zierik7, Netherlands**
Femke Feenstra, partner; architect, Gortemaker Algra Feenstra, Netherlands
- 15.30 Judges concluding remarks

15.45–16.15 Refreshments and Champions Awards poster gallery

**Session 5a: Design for Adaptation and Transformation**

Room: Burdett Suite

Chair: Jim Chapman, advisor, UK;

Judges: Chris Shaw, writer, UK; Christine Chadwick, Archus, Canada

- 16.15 **Carlanderska Hospital, Sweden** Jens Axelsson, architect, White, Sweden
- 16.35 **Doctor Muñoz Cariñanos Hospital, Spain** Ilda Rodriguez, project manager, Planho, Spain
- 16.55 **Hospital Sancta Maggiore Morumbi, Brazil** Lara Kaiser, healthcare design leader; principal, Perkins&Will, Brazil
- 17.15 Judges concluding remarks

**Session 5b: Interior Design and Arts**

Room: Maxwell Room (floor 1)

Chair: Ruth Charity, Oxford University Hospitals NHS FT, UK

Judges: Nicola Bertrand, Asklepios, Germany; Femke Feenstra, GAF, Netherlands

- 16.15 **Campbelltown Hospital Redevelopment, Australia**
Tara Veldman, managing director; health sector lead, Billard Leece Partnership, Australia
- 16.35 **COACH – Centre for Overweight Adolescent and Children's Healthcare, Netherlands**
Léon Wijnhoud, creative conceper and designer; Tinkers Imagineers, Netherlands
- 16.55 **Queen Silvia Children's Hospital, Sweden**
Cristiana Caira, partner and board director; White, Sweden

17.15–17.30 Judges concluding remarks

18.00–
22.00**Champions Awards reception, dinner and ceremony**

Integrated Health Projects by

IHP are delighted to celebrate 10 years of the European Healthcare Design Conference alongside our 20 years of delivering outstanding healthcare solutions. We're honoured to sponsor the Champions Award recognising the very best of healthcare design.

European Healthcare Design Champions Awards Live Judging & Dinner

Champions Awards Lead Partner

Integrated Health Projects by
VINCI + MAALPINE

In celebration of ten years of the European Healthcare Design Congress, we're delighted to welcome you to this once-in-a-decade Champions Awards Live Judging and Dinner.

Supported by Integrated Health Projects (IHP) in celebration of the best in healthcare design globally, this afternoon's live judging sessions and the evening Awards dinner is the culmination of a new competition between 52 previous winners of the EHD Awards in six categories over the last ten years. All previous winners will also be featured on a new Champions Awards digital winners gallery under development.

The six categories are:

- > Healthcare Design (Over 25,000 sqm)
- > Healthcare Design (Under 25,000 sqm)
- > Mental Health Design
- > Design for Health and Wellness
- > Design for Adaptation and Transformation
- > Interior Design and Arts

In each category, three previous award winners have been shortlisted to win the EHD Champions of Champions Award, and will present this afternoon live to the judges. All the projects presenting today were shortlisted in their award category following a robust new judging process that reviewed both the original winning submissions and new information provided by the project teams which included updated images and plans, a 7-minute video presentation, and a project statement responding to the following requirements:

1. Describe the design, operational and sustainability performance over time
2. Provide information on any significant design or building changes?
3. Did the original award win create a positive impact? What lessons have been learnt over time?

All shortlisted projects presenting today are guaranteed to win a EHD Champions High Commendation, with the Champions of Champions Winners being announced at the Awards Dinner this evening.

As we look forward to an exciting afternoon of competition, with our 18 shortlisted projects presenting in six sessions live to the jury, we would like to extend our gratitude yet again to all the judges for their time, expertise and commitment in evaluating the projects. We would also like to thank the project teams for their positive engagement and incredible work that is helping to continually raise standards in healthcare design around the world.

We would further like to thank Integrated Health Projects for its ongoing support and sponsorship of the Awards over the last ten years, as we also use this opportunity to celebrate IHP's 20th anniversary of the joint venture between Sir Robert McApLine and Vinci that has achieved so much for the healthcare sector.

SALUS Global Knowledge Exchange

SALUS is an entrepreneurial global media, research, publishing, events and training organisation with a vision to improve human and planetary health through the global exchange of knowledge.

Our mission is to create, share and disseminate knowledge about the relationship between human health and the natural, built and social environments. We view the two great challenges of our age – the need to maintain and improve human and planetary health as inextricably linked.

European Healthcare Design Congress: Now in its 11th year, the world-leading Congress is a collaboration between SALUS and Architects for Health, supported by multiple UK and international organisations, including health providers, academic and research institutions, professional bodies and NGOs. Bringing together interdisciplinary researchers, practitioners and policy thinkers in health system and service design, technology and infrastructure, more than 1000 participants from 40 countries attended the congress in 2024 either in-person or online.

Healthy City Design International Congress: Now in its 9th year, the Congress brings together leading researchers, practitioners, policy thinkers, community voices and investors from across the fields of city planning, public health, sustainable development, housing, commercial real estate and property, transport, healthcare and education. After six years in London, the congress has now taken to the road, viewing global issues through the context and lens local communities and working design, technology and infrastructure, more than 1000 participants from 40 countries attended the congress in 2024 either in-person or online. Hosted for the past two years in Liverpool, in 2025 and 2026, the Congress will be hosted at the Lowry, MediaCity in Salford, Greater Manchester.

Knowledge exchange – events, publications and broadcasting: Complementing our congresses is our broadcast channel, SALUSTV, which shares and disseminates the latest knowledge and content in the field, and makes the virtual experience richer and more entertaining. Our vision is to stream live and 'on demand' content to a global audience 24/7, featuring people, organisations, innovations that are improving human and planetary health by design.

The SALUS journal and online community: A resource providing a digital platform for publishing, mapping and archiving research, policy and practice in the field of designing for human and planetary health. In ten years, SALUS has published more than 8000 articles and abridged research papers and 3000 hours of video talks and posters in the field, collaborating with a global network of professional, academic and government organisations.

Research advisory: SALUS is currently building an independent research advisory arm. To date, our biggest commission produced a 'Guiding principles' document to support the development of Veraine, a master planned new healthy community, in the City of Pickering, Greater Toronto, Canada.

Health is made at home: In 2020, in a joint venture with Lord Nigel Crisp, former CEO of the NHS (2000-2006), SALUS published Health is made at home, hospitals are for repairs and broadcast a webinar series titled, 'Building a healthy and health-creating society', designed to promote 'health creation' in society. Architects for Health

For over 30 years, Architects for Health has been a forum for sharing best practice, knowledge, innovation and thought leadership in the healthcare built environment.

In 2025, the need has never been greater: the NHS estate is faced with complex challenges, not least the need to deliver sustainable, operationally efficient and cost-effective health and social care, on challenging budgets and even more challenging timescales.

Our membership of over 800 reflects the expertise necessary to design healthcare spaces fit for the future. We now welcome NHS members for free: it is essential that the client – and clinicians – are in the room.

As partners to SALUS Global Knowledge Exchange, we support the programme at the European Healthcare Design Congress and Awards.

Our work falls under four strategic pillars:

- 1. Strategic engagement**, comprising leadership and engagement with the Future Standards Working Group (FSWG); All Party Parliamentary Group (APPG) on Healthcare Infrastructure; and research, in partnership with our academic lead, Dr Evangelia Chryssikou, associate professor at the Bartlett Real Estate Institute
- 2. Knowledge share**, focused around our three thought leadership streams of 'Mind', 'Mend' and 'Matter', featuring a combination of online and in-person events.
- 3. Best practice**, providing access to pioneering healthcare projects through case studies, building visits, exhibitions, and events.
- 4. Fostering future talent**, through our hugely popular annual Student Design Awards, the Ann Noble Research Award (ANRA) annual academic bursary, and our new Future Leaders programme, welcoming the next generation of healthcare leaders to AfH.

Healthcare Planning Academy

The Healthcare Planning Academy is a membership organisation for healthcare planning professionals, which aims to maintain and continuously improve standards and knowledge by providing a professional development resource and an industry-wide framework of recognised accreditation.

Throughout the year, the Academy supports its members to stay ahead of the curve by running regular seminars and events on a range of healthcare planning topics, discussing the latest trends and advances in the planning and design process for health infrastructure.

The Academy is actively welcoming applications from new members who can demonstrate proficiency and experience in healthcare planning, with membership options inclusive of those at any stage of their professional development, including new entrants.

Integrated Health Projects

Integrated Health Projects (IHP) has been a leading provider of outstanding healthcare solutions for over 20 years.

As an established integrated alliance, IHP combines the stability, capacity, coverage and experience of Vinci Building UK and Sir Robert McAlpine. Both are major organisations working in the UK and abroad, focused on development, construction and facilities management.

IHP was formed in April 2003, specifically to act as a principal supply chain partner (PSCP) for ProCure21/21+/22 and we have now secured our place on all Lots in the P23 Framework, whilst also supporting the delivery of current National Hospital Programme Cohorts.

We have been appointed on over 250+ projects, valued at £3.8bn+, for 90+ NHS Clients and we are proud that our Clients have chosen to re-appoint us on 85% of our Projects.

We are committed to working with NHS clients, to provide best value for money through imaginative and sustainable solutions, which offer capital, operational and life-term efficiencies. IHP are pioneers in standardisation delivering low carbon solutions across the building lifecycle.

As well as a fully integrated supply chain, experienced in all facets of healthcare, we bring to every project the technical expertise, robust cost control and programme management skills needed to safely deliver good value, high-quality facilities on time and within budget. We are also able to draw on a wide base of knowledge to address the particular requirements of each NHS client to deliver world-class healthcare facilities for patients and staff.

Guldmann

Guldmann delivers comprehensive solutions tailored to meet current and future moving and handling needs. We specialize in creating more "Time to Care" by addressing lifting and moving requirements, including rehabilitation, across the full spectrum of healthcare environments.

As the global landscape evolves with increasing complexity and unpredictability in societal and business challenges, Guldmann remains committed to addressing these challenges and driving change. This dedication is reflected in our second CSR report, "Sustainability and Social Impact", aimed at achieving our chosen UN Sustainability Goals.

Our services range from project consultancy and personnel instruction right through to service and assembly.

HDR

We believe the way we work can add meaning and value to the world. That ideas inspire positive change. That colouring outside the lines can illuminate fresh perspectives. And that small details yield important realisations. Above all, we believe that collaboration is the best way forward.

For more than a century, HDR has partnered with clients to shape communities and push the boundaries of what's possible. Our expertise spans nearly 10,000 employees, in more than 225 locations around the world – and counting. Our engineering, architecture, environmental and construction services bring an impressive breadth of knowledge to every project. Our optimistic approach to finding innovative solutions defined our past and drives our future.
